DETAILED ACTION

After careful review of claims and the arguments filed on 1/31/03, it is found that a new restriction requirement is needed. Examiner regrets any inconvenience caused by this action. Also, it is noted that the amendments filed on 8/13/01 are not entered yet, because the applicant's representative did not sign the amendments.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 28/13, 31/28/13, 29, drawn to a method and a device for handling an optical signal by selecting an optical path, classified in class 385, subclass 122.
- II. Claims 17-27, 28/17, 30, drawn to a method and a device for handling an optical signal by a mirror thereby proving an internal reflection of the optical beams, classified in class 385, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if

Art Unit: 2872

it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because selecting an optical path does not require a mirror thereby an internal reflection of the optical beams exist. The subcombination has separate utility such as a reflective-type switch, not used to outputting pulse signals.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2872

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
